It has been said that without an education you do not reach your full potential in life. In this day and age most people need to have an education to maintain a good career to support themselves and their families. In order for one to reach their goals in education they need to start from the bottom and work their way to the top. I am at the bottom of this educational pyramid and trying to figure out ways on how to work my way up to the top of the pyramid. With an enormous amount of effort and confidence I am sure that I could reach my goal but not on my own I will need guidance and help.

I am the eldest of five and will be the first to earn my high school diploma and to attend college. I may even be the first in my generation to attend college, this scholarship and education will set a good example of pursuing my goal and will hopefully inspire my siblings and even relatives to work hard and stick to their goals. If I have the blessings of receiving this scholarship and education it will allow me to attend school and help me reach the dream of becoming a teacher for the deaf and hard of hearing. Not only will it make me proud but it will also make my friends and family proud to know that I did not stop believing in myself and never lost the drive to become more for the better of my life.

My family has always put the pressure of how important it is to go to school and make something amazing of yourself and be the best you can no matter what the task. I would like to prove to my family and myself that the task that is put in front of me I will accomplish and will later on in my future appreciate the long lectures, the tears, and long hours of studying. Education is the path to

success and happiness . If I was awarded this education and scholarship I will work my hardest to do well In all of courses and be the best I can. My parents would be so proud to see there eldest attend college and follow my dreams. This scholarship and education would help me so much with schooling and will also help my parents to have the satisfaction that they would not have to stress or worry about putting me through school. My family and I would be forever grateful.

Education is very important and is the main path to success without education one can not maintain a good career. I would love to attend college and to help others, to look forward to all the rewards I will receive with my achievements towards my goal in becoming a teacher for the deaf and hard of hearing. Thank you all for taking time to read my essay and giving me the chance to express what this scholarship and education would mean to me and my family.
